# Recommendation for Processing and Application of Through-Hole Capacitors

#### **Soldering Process**

Internal temperature of the capacitor must be kept as follows:

Polyester: preheating:  $T_{max.} \le 125^{\circ} \text{ C}$  soldering:  $T_{max.} \le 135^{\circ} \text{ C}$ 

Polypropylene: preheating:  $T_{max.} \le 100^{\circ} \text{ C}$  soldering:  $T_{max.} \le 110^{\circ} \text{ C}$ 

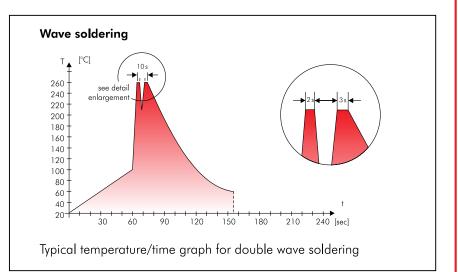

#### Single wave soldering

Soldering bath temperature:  $T < 260^{\circ}$  C Dwell time: t < 5 sec

#### Double wave soldering

Soldering bath temperature:  $T < 260^{\circ}$  C Dwell time:  $\Sigma t < 5$  sec

Due to different soldering processes and heat requirements the graphs are to be regarded as a recommendation only.

### WIMA Quality and Environmental Philosophy

#### ISO 9001:2008 Certification

ISO 9001:2008 is an international basic standard of quality assurance systems for all branches of industry. The approval according to ISO 9001:2008 of our factories by the infaz (Institut für Auditierung und Zertifizierung) certifies that organisation, equipment and monitoring of quality assurance in our factories correspond to internationally recognized standards.

#### **WIMA WPCS**

The WIMA Process Control System (WPCS) is a quality surveillance and optimization system developed by WIMA. WPCS is a major part of the quality-oriented WIMA production. Points of application during production process:

- incoming material inspection
- metallization
- film inspection
- schoopage
- pre-healing
- pin attachment
- cast resin preparation/ encapsulation
- 100% final inspection
- Testing as per customer requirements

#### **WIMA Environmental Policy**

All WIMA capacitors, irrespective of whether through-hole devices or SMD, are made of environmentally friendly materials. Neither during manufacture nor in the product itself any toxic substances are used, e.g.

- Lead

- PBB/PBDE

- PCB

- Arsenic

- CFC

- Cadmium

- Hydrocarbon chloride

- Mercury

- Chromium 6+

oto

We merely use pure, recyclable materials for packing our components, such as:

- carton
- cardboard
- adhesive tape made of paper
- polystyrene

We almost completely refrain from using packing materials such as:

- foamed polystyrene (Styropor®)
- adhesive tapes made of plastic
- metal clips

#### **RoHS Compliance**

According to the RoHS Directive 2011/65/EU certain hazardous substances like e.g. lead, cadmium, mercury must not be used any longer in electronic equipment as of July 1st, 2006. For the sake of the environment WIMA has refraind from using such substances since years already.

Tape for lead-free WIMA capacitors

#### **DIN EN ISO 14001:2004**

WIMA's environmental management has been established in accordance with the guidelines of DIN EN ISO 14001:2004 to optimize the production processes with regard to energy and resources.
